GBP 170.00

Web 販売価格 ¥41,719 / 標準価格 ¥53,856

Through twelve analytical chapters, the book explores how Yan Fu of China and Fukuzawa Yukichi of Japan navigated the paradox of tradition versus progress. Key themes include their contrasting approaches to Western science, political freedom, economic reform, and cultural identity, revealing why Japan embraced rapid modernization while China struggled. The work dissects critical frameworks such as "Chinese essence/Western application" versus "Japanese spirit/Western knowledge" and is enriched by an analysis of archival documents on their views on law, religion, education, and historical evolution.

This book chronicles the history of Chinese miners in one of the largest mines in Northeast Asia from 1900 to 1948, situating this emergent working class at the nexus of industrial capitalism, imperial expansion, and nation-state construction. Coal from Fushun (in present-day Liaoning province) fuelled industrial development that enabled the JAPANESE EMPIRE and later rival Chinese regimes to secure their economic, political, and military presence in the region. In turn, the extraction, processing, and distribution of Fushun coal depended on rendering immobile previously mobile migrant workers through coercion, surveillance, and incentives.

Sadanobu's research on fluency and disfluency in Japanese reveals that disfluency among healthy native speakers follows predictable patterns and may actually enhance their everyday communication. Drawing from diverse fields including linguistics, conversation analysis, language education, and language disorders research, the contributors extend their analysis to practical applications in second language teaching and speech synthesis, presenting disfluency as a spectrum that encompasses native speakers, language learners, and language-impaired individuals.

Once the exclusive domain of the aristocracy, classical Japanese poetry (*waka*) underwent a remarkable transformation in the medieval period, becoming a dynamic tool for cultural education embraced by warriors, monks, merchants, and commoners alike. Ariel Stilerman investigates this evolution by examining not only poetic treatises but also overlooked genres - encyclopedias, professional manuals, Buddhist essays, literary primers, didactic fiction, and popular tales.

This is a detailed and richly illustrated exploration of pilgrimage mandalas (sankei mandara). These large-scale, brightly colored landscape paintings, which appeared in late-medieval Japan, present aerial views of sacred sites, the roads leading to them, and the rites performed there. Carried by itinerant monks and nuns throughout the country, pilgrimage mandalas were used in lively narrative performances called etoki. After exploring the origins of this art, Talia Andrei engages in a series of detective-like analyses, unraveling the subtle hints of institutional networks and power struggles concealed within the figural and architectural motifs of the paintings. This approach shows how visual sources, when read with and against textual records, can fundamentally change, shift, or enhance what we know about a given time and place in history. Studied in this way, a pilgrimage mandala not only reveals hidden clues to historical uncertainties left murky in the textual archive but also serves as a visual testament to the cultural and institutional forces that shaped its creation.

This study aims to deepen the understanding of Japan's evolving national security outlook since the Cold War period to the present. It uniquely attempts to integrate debates on the interpretation of the "Peace" Constitution, viewpoints on nuclear deterrence and disarmament, and attitudes toward the "history issues" into a composite whole and relate it to Tokyo's foreign and defense policies.

This book explores how regions can thrive beyond traditional agglomeration economies by leveraging the concept of "borrowed size" - the ability of smaller or peripheral areas to benefit from proximity to large urban centers without hosting large-scale economic activity themselves. Focusing exclusively on Japanese prefectures, the book provides comprehensive empirical analyses of how spatial interdependencies shape regional productivity, efficiency, and innovation performance.
